

KiwiSaver Survey

June Quarter 2019

Over the June quarter the S&P/NZX 50 Index was up 6.7%. Australian share performance has also been very strong with the S&P/ASX 200 index up 8.0% over the quarter. Returns of KiwiSaver funds generally reflected the strength of underlying market conditions. All surveyed KiwiSaver funds made positive returns. Average multisector category returns ranged from 4.2% for the Aggressive category to 2.1% for the Conservative category.

Please note this is a revised report to the release on the 31 July. A number of the AON Russell Lifepoint fund returns have been amended.

Tim Murphy
|31-July-19|

Morningstar's quarterly KiwiSaver Survey is designed to help New Zealand investors assess the performance and other key characteristics of their KiwiSaver superannuation options. The accompanying tables show KiwiSaver fund returns for the one, three, five and ten years to 30 June 2019.

We hope you find this KiwiSaver survey helpful and welcome any feedback.

Market Commentary

Over the June quarter the S&P/NZX 50 Index was up 6.7%, and 19.2% year-to-date. Australian share performance has also been very strong with the S&P/ASX 200 index up 8.0% over the quarter and 11.6% over the year. Gains have been widely spread across sectors. At the head of the list, IT shares have been in high demand and the resources sector has also done very well. The formerly out-of-favour financials are also up, while even the weakest of the main sectors (consumer staples) was up 13.6%.

International equities had another good quarter, and for the year to date the MSCI World Index is up by 17.1% in U.S. dollars. To some degree the results have been dependent on the U.S., where the S&P 500 is up 19.3% and the Nasdaq is up 23.0%, but even without the U.S., the MSCI World Index is up 13.0% in U.S. dollars for the year to date. Even sharemarkets that have had relatively poor economic performance have done well. In the eurozone, the FTSE Eurofirst300 Index is up 15.4% (in euros), and despite the rising chance of a no-deal Brexit, U.K. shares have also risen, with the FTSE 100 up by 12.3% (in sterling). Japan has continued to be the laggard among major markets, with a relatively modest 8.7% gain (in yen).

Emerging markets have not completely shaken off the crisis in investor confidence of last year and have not matched the outcomes in developed markets. Even so, investors will be pleased with the 9.8% gain in U.S. dollars for the MSCI Emerging Markets Index. The core "BRIC" economies (Brazil, Russia, India, China) did better than most, with a 13.8% U.S. dollar gain.

Russia was the strongest of the four, with shares up by about a third (FTSE Russia up 36.4%).

New Zealand listed property followed the global pattern of income-oriented equity classes doing well as bond yields fell. The S&P / NZX All Real Estate Index for the year to date has delivered a total return of 21.6%, outperforming the 19.2% return from the S&P / NZX 50 Index. It was the same story, except more so, in Australia where the S&P / ASX200 A-REITs Index comfortably outperformed the wider sharemarket.

Short-term interest rates have moved lower this year: The 90-day bank bill yield is now 1.62%, down 0.35% since the start of the year. There has been little net movement in the value of the New Zealand dollar. For the year to date, it is down by a slight 0.5% in overall trade-weighted value, with the only significant currency movement being a 2.7% decline against the Japanese yen.

Quarterly Fund Manager Results

The June quarter saw markets continue to rally, returns of KiwiSaver funds generally reflected the strength of underlying market conditions. All surveyed KiwiSaver funds made positive returns. Average multisector category returns ranged from 4.2% for the Aggressive category to 2.1% for the Conservative category.

Top performers over the quarter against their peer group includes **Milford Conservative** 2.9% (Multisector Conservative), **Generate Conservative** 3.3% (Multisector Moderate), **Milford Balanced** 4.9% (Multisector Balanced), **Aon Milford** 5.9% (Multisector Growth), and **Generate Focused Growth** 5.6% (Multisector Aggressive).

Annual returns for multisector options ranged from 10.2% down to 2.3%. The Aggressive category average recorded 7.5% for the year, followed by Growth (7.4%), Balanced (6.9%), Moderate (6.4%), and Conservative (5.9%).

It is most appropriate to evaluate performance of a KiwiSaver scheme by studying its long-term returns. Over 10 years, the

Growth category average has given investors a double-digit annualised return of 10.6%, followed by Aggressive (9.3%), Balanced (8.7%), Moderate (7.1%), and Conservative (6.4%).

Market Share

KiwiSaver assets on the Morningstar database grew to more than NZ\$57.2 billion at 30 June 2019 from NZ\$48.7 billion at 30 June 2018. ANZ leads the market share with more than NZ\$14.0 billion. ASB is in second position, with a market share of 18.3%. Westpac holds third spot ahead of AMP, while Fisher Funds sits in fifth spot. The six largest KiwiSaver providers account for approximately 80% of assets on our database.

About This Survey

This survey groups KiwiSaver options according to their mix of income and growth assets, or “asset allocation”. This is one of the most important decisions to make when saving for retirement. The term “income assets” refers to cash and fixed interest securities that generally produce stable and reliable returns but offer little opportunity for long-term capital growth. Returns from “growth assets” such as property and shares will be erratic – as recent market volatility has demonstrated – but over time have shown greater capacity for increasing in value. The mixture of income and growth assets is the major determinant of potential return and volatility.

Investors may notice differences between the returns published in this survey and those they see elsewhere. There are several possible reasons for this. First, the returns published here are after fees but before tax. Second, we take the associated tax credit into consideration when calculating and publishing these returns, while some fund managers base their published performance figures on month-end unit prices only. ■■

Morningstar KiwiSaver Report: 30 June 2019

Please note:

- Past performance is not a guide to future performance. This year's best performers can easily be next year's worst.
- Understanding your risk profile, and the mix of growth and income assets is critical.
- Fees are the one constant that will always eat away at your returns. Take a close look at the cost of your KiwiSaver Scheme.

Some material is copyright and published under licence from ASX Operations Pty Ltd ACN 004 523 782. Returns are before tax and after fees. The performance for ASB, AMP, Forsyth Barr and Tower reflects fees that are charged as a percentage of your account balance and paid by cancelling units. Please contact Morningstar if you require clarification. Morningstar requested a (Total Expense Ratio) TER to be provided and calculated by Providers in line with the IOSCO international standard calculation, excluding dollar-based account fees. The dollar-based account or membership fees are payable in addition to the other fees captured in the TER, and are not reflected in the fund's performance. Und. = Undisclosed. * - Performance numbers supplied directly from the provider rather than calculated independently by Morningstar. ** - Median rather than a mean. *** - Minimum fee up to \$40/50 depending on option is charged, inclusive of other costs. **** - \$40 fee but \$0 if balance is over \$5,000.
